AGENDA

10:00 – Missouri One Call Informational Update

10:45 – Locating 101 (A comprehensive training program)

11:45 – Lunch (Provided by Missouri One Call System)

12:30 – Field Training (On-Site Locator Training)

2:00 – Adjourn

About The Training:

This **FREE** class will provide information on understanding how locators work and best practices for using a pipe or cable locator. Topics covered include, how a locator works, why it doesn't, operating a locator properly, confirming locate accuracy, accessories and type of locator needed. Locators vary from the earliest witching sticks up to and including magnetic locators and ground penetrating radar. This session will give a brief review on the effectiveness of each type of locator and their benefits and applications. The instructor will be Travis Beran of Subsurface Solutions and certificates of completion can be provided upon request.

The field component of the training will be conducted offsite but in close proximity to the meeting location. As this will be an outdoor activity, please dress accordingly (including weather appropriate clothing and safety vests). Additionally, please plan to bring the locator that is used in your organization if possible to expedite training.

Please RSVP as soon as possible if you plan to attend so that we may plan accordingly. You may attend the informational meeting only or both sessions if you wish. Please indicate which sessions and the number of people from your organization that will be attending by visiting the MOCS website at www.mocall.com **OR** by detaching and returning the form below. Please contact Derek Leffert at (573) 280-8500 with any questions.
